Organization

EXPERIENCE

Sensus

I am currently a Software Developer Intern at Sensus. My primary jobs are to upkeep tests and write various scripts using JavaScript(Node.js) to simulate real-life situations and problems that we might run into. I also took this opportunity to shadow our product owner and gain helpful insight into what it takes to become a successful vessel of knowledge to and from the customer.

Garrigan Lyman Group

I was a web development Intern for the Garrigan Lyman Group for six months. During this time I got the opportunity to work side by side with both front-end and back end developers to learn and enhance my java, C#, Html/CSS and JavaScript skills.

Best Buy

I worked for best buy for a little over a year and won the title of "Top Gun", which at best buy is one of the biggest awards you can win in my position. This award was given to the top 100 salesmen in the entire company.

Old American Insurance

For OAI I sold life insurance door to door. I worked for them for about eight months, before I had to move away to go to college. This job allowed me to grow my social skills tremendously.
